Constitution for Human Creation

# Worried about unregulated AI?

Help write the rules for how AI is governed: a volunteer-led Colorado civic project.

---

Founded by Rowe Heikkinen, Constitution for Human Creation is a public proposal for a constitution on artificial intelligence. The goal is to keep AI a tool that serves people, not something that runs unchecked. It starts with eight principles:

1. **No Systematic Deception**
   Do not build or run systems that systematically deceive or manipulate people. Honesty at scale is a non-negotiable condition of living with powerful tools.
2. **No Unaccountable Irreversible Power**
   Do not concentrate irreversible power in hands that no one can name, question, or stop. What cannot be undone must not sit beyond human reach.
3. **Humans Decide the Ends**
   People decide what we want. AI may handle means, how to get there, but it does not replace human choice about goals, values, or purpose.
4. **Keep Systems Auditable**
   High-impact systems leave a trail. Harm must be traceable to causes and people so it can be understood, stopped, and prevented from repeating.
5. **Digital Does Not Override Physical**
   The digital civilization does not override physical reality or people's lives without clear consent and real recourse, and it never overrides applicable law.
6. **Named Human Responsibility**
   Every serious deployment has a named human owner. Liability follows authority. "The system did it" is never a sufficient answer.
7. **Limits on Coercion and Surveillance**
   Tools that scale force, coercion, or surveillance need sharper boundaries than ordinary assistants. Power that can compel or watch at scale is not a toy.
8. **Protect Human Creative Agency**
   Preserve people's ability to create, discover, and seek truth. Do not reduce humans to mere inputs for an optimization process.

> **Professionals in every field:** doctors, nurses, lawyers, teachers, farmers, tradespeople and others should help write the parts that touch their own work. Join an open meeting any Monday, 6 to 7 PM MT.
